The media hurts society because they destroy human privacy and identity through their expectations of a human that actually not met to be. Disney film are often show as very innocent, the images they feed to children are unrealistic by believing on something its not real, this one movie called "Ariel (the little mermaid)." The movie is about a woman showing a seductive body and risking everything to find her own perfect prince. This piece of media shows, media hurts women by showing them, as sexualized, seductive and powerless.

The first reason, this piece of evidence hurt women by a highly sexualized of a woman. According to the image movie, the little mermaid, its shows that, Ariel is sexualized with large breast, a tiny waist and fluttering eyelashes. This mean media showing an image of Ariel with her half naked body is giving an idea of women should have sexy body, in order a man will like her and woman should be seductive through their beautiful eyes by putting make un in order to look beautiful. In addition woman is being hurt by the media because of an ideal girl according to man. According to the article we read named "eating disorder" it shows that " 95% of those who have eating disorder are between the ages 12" this shows young girls want to be sexy, by not eating enough food to keep them sexy. This also proves that because of media. They showing image that effect young girls to look sexy and skinny. To show that they are an ideal of a sexy girl that attracts boys. As you can see media hurt women by influences women to have a sexy body.

The second reason, this piece of evidence hurt women by, being under controlled. The source Ariel (the little mermaid) it shows that, "Ariel risks everything like her life as a mermaid, to fight for a sea dangerous witch named (Ursula) the witch have, given Ariel a choice to give up her beautiful voice, to be part of human and to be with her perfect prince." This shows that Ariel, did so many things she fight a ugly witch just to have a feet, just to get the magical shell, just to find her perfect prince in the land of humans. Ariel is willing to leave everything; she gave up her voice, which makes a woman powerful through speaking, just to be with her perfect prince. This also proves that women are weak because they are too desperate for man's love. This effect young girl by believing and looking for their perfect prince in a beautiful romantic place, that they should obey their own parents so they can be with their perfect prince. In addition media hurts women because, women should be easy to get if a guy ask them out. According to Isla Vista shooting , it shows that, a man stubbing a women and count each time he stubbed them, that represent the age, women rejected him. "This shows that, men in the Vista shooting, he felt rejected it shows men being violence, of women because he felt rejected of these girls, he want to take a revenge, by hurting women who, rejected him and didn't t give what he wanted. The media influences men, how to they treat women, to show women are powerless and being subordinate, and they should easy to get, when men ask them to. As you can see, women are more treated badly by the media, on how women are weak and should be easy to get.

One opposing claim, media hurt men more than women. According to this Disney film, "Ariel" it shows that, "Prince Eric drives one of the ship through Ursula's abdomen, breaking her concentration long enough for the trident's power to backfire and destroy her instead." This show prince Erick is being violence by, using a boat hook wood, to kill the witch that lead her to death. Someone says that media hurt men more, because they only shows them as violence, gangster, bad, killer and all the violence going on to the society. However, this claim is weak because women hurt more by the media because

they are being affected of violence of men. According to the “tropes Vs. Women” It shows that, women are being killed and controlled” this means because of men violence the giving idea to hurt women by killing and being controlled. Even though, media hurt men, they always show men are being dominant and women are always being subordinate. But, women also more effected of the violence and treated badly and use for sex objectification. As you can see, this ad hurt women more often than a man.

In conclusion the media hurt women by using them as sex objectification, subordinate, weak and also reduces women’s dignity. One reason, media hurt women by, women shows their sexualized body and they should be seductive for men. Second reason, an unrealistic prince and how women are threated powerless. In today’s world, women are still weak and don’t have more power to speak up, in our congress today, we doesn’t see many women, that can dictate and give them opinion to manage a country. Mostly women are at home, and manage the house hold chores and not by recognizing women as their own value.
